BRUSHING BASICS IN 5 EASY STEPS

GET COMFY: Build a routine once daily, at the same time each day, to practice and brush teeth.

DENT-A-LICIOUS!! Start with yummy pet toothpaste on your finger and let them lick and investigate - then rub a little on their gums.

ROUTINE: Continue Step #2 for at least 1 week until they know what to expect for the routine.

MEET THE BRUSH: Introduce a finger brush or a bristle brush, now that they are comfortable.

SIMPLE! You just have to do the outside of the teeth, not the inside of the mouth. Slide the brush, with or without lifting the gums, along the teeth. You may need to open the mouth but only slightly for one lower molar that can be hidden.
